# Increase the Lifespan of Equipment with Safe Descaling

## Clean harmful buildup that can shorten service life

Scale buildup in equipment can compromise the ability to heat and cool correctly, making it work much harder than it needs to, leading to equipment overheating or failure, and energy inefficiencies. CLR PRO® products provide time-saving solutions with easy to use formulas that work right with regular maintenance.

**Ready to Use for Regular Use:** Ready to use products eliminate the need for complicated dilution equipment and extensive training, while reducing the risk of accidental exposure. Safe for regular use allows operators to keep equipment operating at ideal performance levels.

**Safe ingredients.** Avoid health problems from frequent exposure to toxic chemicals typically used to clean water systems equipment. CLR PRO® products contain no harsh chemicals, like ammonia, phosphates, or solvents. They are also readily biodegradable, non-abrasive, and have little-to-no VOCs.
